## Financial Overview for FY 2013 through September 30, 2013

## **Agency**

- Audited FCRPS Net Revenues for FY 2013 are negative \$105 million. This is \$23 million greater than the rate case forecast.
- Adjusted Net Revenue for Power and Transmission is \$56 million.
  - The Rate Case forecast of Adjusted Net Revenue was \$27 million and the Start-of-Year forecast was \$51 million. The 3rd Quarter Review forecast was \$75 million.
- Cash Reserves ended at a level of \$1,272 million, an increase of \$250 million from last year. Reserves available for risk were \$641 million.
- BPA spent \$883 million on capital projects in FY 2013. This includes projects for Federal Hydro system replacements, transmission expansion and replacements, energy efficiency, fish and wildlife, and information technology projects.

### **Power Services**

- Power Services Net Revenues for FY 2013 are negative \$15 million.
  - Operating Revenues for FY 2013 are \$2,632 million.
  - Total expenses (operating expenses and net interest) for FY 2013 are \$2,647 million.
- Power's Net Revenue forecast for the Rate Case was negative \$2 million and Start-of-Year was negative \$17 million. The 3rd Quarter Review forecast was \$0 million.
- Power Services net revenues were \$14 million less than the rate case forecast.
  - Due to lower than expected streamflows, revenues (total revenues less power purchases, augmentation, and transmission acquisition) in FY 2013 came in \$127 million below the rate case forecast. The primary drivers were:
    - Net Secondary revenues were \$18 million below rate case, due to a lower market price environment and below-average water year.
    - Lower preference loads than expected reduced load shaping and demand revenues by a total of \$46 million.
    - The 4(h)(10)(C) credit was lower than the rate case by \$12 million. This decrease was due to lower than forecast market prices which resulted in lower purchase power costs.
    - Transmission acquisition costs came in \$10 million higher than the rate case.
  - Power Services expenses (total costs excluding power purchases, augmentation, and transmission acquisition) were \$113 million below the rate case forecast.
    - Trojan operation and maintenance costs were \$28 million less than the rate case due to the Trojan Spent Fuel Settlement.
    - Energy Northwest debt service decreased \$23 million due to additional nonfederal refinancing/restructuring and the ISFSI settlement.
    - Columbia Generating Station costs were \$16 million lower due to updates to the decommissioning trust fund schedule (due to a CGS license extension) and the return to CGS of excess monies related to the depleted Uranium Program.
    - Internal operating costs were \$11 million below the rate case due to hiring delays, contracting delays for R&D projects, slower than expected progress for the EIM system, and the use of fewer IT resources for the new regional contracts.
    - Net interest costs were \$12 million less than forecast due to a reduction in the average interest rate for federal bonds offset somewhat by increases
      in the interest expense associated with Pre-Pay funds.
    - Depreciation and Amortization costs were \$9 million higher due to IT capital projects being placed in service sooner than expected and Fed Hydro
      plant in service actuals coming in higher than forecast.
    - Renewables costs were down \$8 million due to lower than expected spending for new resource development and the receipt of FERC-ordered punitive damages for Foote Creek I and IV wind projects.
    - Conservation Acquisition costs were down \$6 million due to contracting challenges and funds held to accommodate forecasted partner spending that did not materialize.

## Financial Overview for FY 2013 through September 30, 2013

### **Transmission Services**

- Transmission Services Net Revenues for FY 2013 are \$71 million.
  - Actual Revenues for FY 2013 are \$980 million.
  - Actual Total Expense (operating expenses and net interest) for FY 2013 are \$909 million.
- The Net Revenue Rate Case forecast was \$29 million and the Start-of-Year forecast was \$69 million. The 3rd Quarter Review forecast was \$75 million.
- Transmission Services exceeded expectations with net revenues coming in \$43 million over the rate case forecast.
  - Revenues were \$10 million higher than the rate case mainly due to higher than expected Reimbursable, PTSA termination fees, and Gen Input revenues offset by decreases in Point-to-Point revenues.
  - Lower spending, \$33 million, was primarily driven by lower depreciation and interest expense reflecting lower than expected capital spending and lower than expected interest rates on borrowings. These savings were partially offset by unexpected capital to expense write-offs and settlement payments.

<sup>&</sup>lt;1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties among other factors may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.</p>

<sup>&</sup>lt;2 The consolidated FCRPS Statement reduces reported Revenues and Expenses where between business line transactions occur, the most significant of which are for Transmission Acquisition and Ancillary Services.</p>

The Residential Exchange Program expenses reflect the Scheduled Amount of REP benefits payments established in the 2012 REP Settlement Agreement. The Scheduled Amount of REP benefit payments incorporates a \$76,537,617 reduction in REP benefits to provide Refund Amount payments to COUs. The Refund Amount returned to the COUs is reflected through a reduction in the Gross Sales amount.

ANR = \$-0.5

Power Services ANR as-of 3rd Quarter Forecast FY2013 (in Millions) (\$0.5)

CRAC: No DDC: ANR ≤ (\$185.5)

CRAC or DDC ANR ≥ \$564.5

<sup>&</sup>lt;1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.</p>

<sup>&</sup>lt;2 The Residential Exchange Program expenses reflect the Scheduled Amount of REP benefits payments established in the 2012 REP Settlement Agreement. The Scheduled Amount of REP benefit payments incorporates a \$76,537,617 reduction in REP benefits to provide Refund Amount payments to COUs. The Refund Amount returned to the COUs is reflected through a reduction in the Gross Sales amount.</p>

<sup>&</sup>lt;3 Accumulated Net Revenue (ANR) for 2013 is the current forecast of Power Services Net Revenue for 2013. The Cost Recovery Adjustment Clause (CRAC) is an upward adjustment to certain rates that would apply during FY2014. The Dividend Distribution Clause (DDC) is a downward adjustment to certain rates that would apply during FY2014. For more information on ANR, CRAC or DDC, please refer to pages 39-49 of the 2014 Wholesale Power and Transmission Rate Adjustment Proceeding (BP-14), Appendix A: Power Rate Schedules (BP-14-A-03-AP01-CC01) http://www.bpa.gov/Finance/RateCases/BP-14RateAdjustmentProceeding/BP14FinalProposal/BP-14-A-03-AP01-CC01.pdf</p>

<sup>&</sup>lt;1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties among other factors may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.</p>

The Residential Exchange Program expenses reflect the Scheduled Amount of REP benefits payments established in the 2012 REP Settlement Agreement. The Scheduled Amount of REP benefit payments incorporates a \$76,537,617 reduction in REP benefits to provide Refund Amount payments to COUs. The Refund Amount returned to the COUs is reflected through a reduction in the Gross Sales amount.

<sup>&</sup>lt;1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.</p>
